CERTIFICATIONS

Introduction to Computer Graphics (UCV) | Digital Image Processing (UCV) | React – La Guía Completa: Hooks Context Redux MERN +15 Apps ([Udemy](#)) | Fundamentos de Typescript ([Platzi](#)) | Curso de Typescript: Tipos avanzados y funciones ([Platzi](#)) | Curso de React.js ([Platzi](#)) | Curso de TypeScript: Programación Orientada a Objetos y Asincronismo ([Platzi](#)) | Curso profesional de Git y Github ([Platzi](#)) | Curso de React.js con TypeScript ([Platzi](#)) | Curso profesional de CSS Grid Layout ([Platzi](#)) | Curso de Introducción al Testing con Javascript ([Platzi](#))

SKILLS

Main tools: Javascript (ES6+), Git, CSS3, GSAP.

Web development: ReactJS, ThreeJS, TypeScript, Redux, NextJS, GatsbyJS, Autodux, Redux Saga, Gatsby, GraphQL, FaunaDB.

Unit testing: RITEWay, Jest, react-testing-library.

PROFESSIONAL EXPERIENCE

Tokischa World Tour May 2023 - Jun 2023

- **Web Application** | Creation of a static website for the singer Tokischa using GatsbyJS.

The Hit, Spain Nov 2022 - Present

- **Web Application** | Building interfaces, calling API's using NextJS.

Colegio Kavak, Internships, Venezuela Jul 2022 - Oct 2022

- **Web Application** | Built the website using Gatsby, DatoCMS for content management and GSAP for animations.

Parallel Drive – Eric Elliott, React Developer, US Jul 2020 – Jul 2022

- **Confidential Project – Business Logic** | Helped create parts of the app tasks using Solidity for web3 logic, RITEWay for unit tests, Autodux (Redux) for state management, Redux Saga for side effects, Magic Link for login, FaunaDB, GraphQL and Travis CI for continuous integration.
- **Confidential Project – 3D** | Built under NextJS the login presentation of this web application. Used the MagicLink library to handle the login and React Context API for state management. Also, using basic math and ThreeJS to build a 3D interface with a lot of user experience.
- **DevAnywhere** | Developed and designed the frontend of this web application under NextJS using react-three-fiber (ThreeJS) and GSAP.

My Portfolio, React Developer, Venezuela Jan 2020 - Jun 2020

- **Portfolio** | Built my website, using Gatsby, rendering 3D models using basic math, ThreeJS and a bit of GLSL.

Freelance, Frontend developer Jan 2017–Jan 2020

- **Moto Centro Madrid** | I developed and designed the website using GSAP and Vanilla Javascript configuring Babel and Webpack. Deployed this website with Netlify.
- **Dei Company** | Developed the web application based on the design of the Fleava website using React stateful components, GSAP and ThreeJS. Deployed this app with AWS Amplify.
- **Smart4U** | Created a website preloader animation using the GSAP timelines.
- **The Beauty Shop Css** | Developed the website using jQuery and CSS3.
- **iEvo** | Developed the interface of the website using jQuery, CSS3 and GSAP.
- **Splendor** | Helped on the frontend of this website.

Eficiatech, Junior Frontend Developer, Venezuela Jan 2016 –Jan 2017

- **UI Development** | Developed part of web application UI under Ruby on Rails, using GSAP for transitions and basic animations.
